ENHANCER**

V-Dox - Sexual Performance Enhancer for Men

V-Dox is an all-natural supplement composed of highly purified extracts of the herbal plants *Tribulus terrestris* and *Ginkgo biloba*.

Ingredient of **Tribulus**, a natural compound called protodioscin. Enriched over 100- folds, the concentrated protodioscin in V-Dox allows men to experience its benefits in a much shorter period of time.

Together with purified ginkgo flavone glycoside, the active ingredient of **Ginkgo biloba** shown to help promote microvascular circulation and improve blood flow, the protodioscin in V-Dox is clinically proven to improve men's sexual health, help naturally treat sexual performance problems, and boost energy level and vitality without any unwanted side effects.

V-Dox also has the addition of **L-Arginine**, a natural amino acid required in the biosynthesis of signalling molecules necessary for a normal erection cycle.

Suggested Use

V-Dox with L-Arginine offer a choice of three easy programs:

Basic Program - 1 Capsule Daily

For normal men who want to increase their sexual performance, increase their sex drive, as well as improve sexual pleasure, stamina, and energy level. Most men will start to experience the benefits of V-Dox in about 4 to 6 weeks.

Accelerated Program - 1 Capsule 3x Daily

For normal men who want to increase their sexual performance in a shorter period of time. Most men will start to feel its benefits in 3 to 4 weeks.

For men with mild symptoms of sexual performance problems. Most will start to feel the benefits of V-Dox in about 3 to 6 weeks.

Optimal Program - 2 Capsules 3x Daily - RECOMMENDED

For normal men who want to increase their sexual performance in the shortest period of time. Most will start to feel the benefits in 2 to 3 weeks.

For heavier (more than 200 lbs.) but otherwise normal men who want to increase their sexual performance and pleasure. Most will start to feel the benefits in 3 to 6 weeks.

For men with medium to severe forms of sexual performance problems. Most will start to feel the benefits in 4 to 8 weeks.

Gentle Yet Effective Action

V-Dox works gently to address the root causes of the sexual performance problems and to help support your body's natural balance for optimal sexual health and vitality.

Indeed, one study showed that V-Dox treatment resulted in significantly increased sex drive in 33% of men after 30 days and in 80% of men after 60 days. Similarly, arousal improved in 53% of men after 30 days and 87% of men after 60 days. The study also showed that orgasm quality improved significantly in 40% and 87% of men after 30 and 60 days, respectively (Dr. KM Arsyad, 1996).
